

Ground Rules:

- 1) Not defending or presenting any ideas or theories. Concepts, questions, "1 fact".
- 2) Assume all photos/videos are possibly fake and/or AI generated.

Sources of Info: i) The Standard Flat Earth Model
ii) Length of daylight in Summer in Australia.

Q: Summer in Australia, Fact or Fiction?

1 Fact: (Prove me wrong...) Australia has longer daylight than nighttime in their Summer (12/13).
"Summer" Days are longer than nights.

Claim ↑ Only Doubtable Part.

Q: How many hours of daylight does Australia experience in December? (Summer)
↑
growing season

A #1 Somewhere between 11 and 12 hours maximum daylight.
↑
rounded up.

Not Quite Summer.
↑
non-numerical SFEM

A #2: 13 hours, 52 minutes!

Gazette
Predicts
Summer!

A #3: 17 hours (max @ Climate.top)
Summer!

A #4: Numerical Standard Flat Earth Model

Assuming the light disk is 2 full "blocks" away from
the sun in each direction.

$$\begin{array}{r} 20:20 \\ - 12:05 \\ \hline 8:15 \end{array}$$

of daylight

Not Summer!
